LEAD IMPACTFUL REAL-WORLD RESEARCH IN LEARNING HEALTH SYSTEMS

Patricia Franklin, PhD

Martha Burla, MPH

Christy Pavetto, MS

Healthcare organizations face increasingly complex challenges that cannot be solved by research working in isolation. Learning Health Systems (LHS) leaders can bridge the gap between evidence generation and practice, ensuring that knowledge is translated into meaningful improvements in care, patient outcomes, and health system performance. Join an established team of research, health administration, and patient engagmenet to learn how you can use LHS competencies to accelerate healthcare transformation and drive lasting impact.

WORKSHOP PARTICIPANTS WILL LEARN TO APPLY LEARNING HEALTH SYSTEM PRINCIPLES, TOOLS, AND STRATEGIES TO:

- Translate evidence into real-world impact
- Lead high-performing, multidisciplinary teams
- Foster health system leader, clinician, researcher, and patient engagement and consensus
- Solve complex healthcare challenges with systems thinking and organizational behavior principles

ACADEMY INFORMATION

- May 11-13, 2027
- Cost: $3,000
- 25 Available slots

APPLICATION INFORMATION

Please submit the following:

- A CV, biosketch, or resume
- A paragraph describing how this workshop will advance your LHS research career
- An abstract or project charter for a study/project that you lead or are planning that will benefit from your participation.
