

**Associate Professor in Quantitative Methodology, Department of Medical Social Sciences and Third Coast Center for AIDS Research (CFAR), Feinberg School of Medicine, Northwestern University**

The Department of Medical Social Sciences (MSS), Feinberg School of Medicine at Northwestern University (NU) invites applications from qualified individuals for an Associate Professor in the Team Scientist Track (non-tenure eligible), full-time faculty position. We seek candidates with expertise in quantitative methodology and behavioral/social/clinical sciences relevant to HIV/AIDS research. This new position is part of the planned growth of HIV research at Northwestern University, which has recently established the NIH funded Third Coast Center for AIDS Research (CFAR). The candidate will join an outstanding group of quantitative scientists who apply state-of-the-art statistical methods to a broad range of research areas, including the MSS Psychometrics and Biostatistics Core and the NUCATS Center for Data Science and Bioinformatics. The successful candidate will complement these existing areas of strength, serving as a bridge between the broader NU quantitative community and HIV/AIDS researchers. As a team scientist, the faculty member will contribute critical expertise to the CFAR program and collaborate with the group of research teams engaged in HIV/AIDS research, serving as co-investigator, and will also have the opportunity to serve as Principal Investigator (PI). Candidates should hold a doctoral degree in the social, behavioral, or health sciences (e.g., quantitative psychology) or biostatistics and have a research focus on quantitative methods relevant to HIV/AIDS research such as measurement of HIV/AIDS transmission risk, modeling prevention preferences and/or clinical outcomes, analysis of network and nested datasets, and/or longitudinal and multilevel analyses. The ideal candidate will have an excellent track record of publications including as quantitative methodologist and experience as a co-investigator or PI on HIV/AIDS behavioral and biomedical grants. A strong collaborative orientation is essential. Participation in MSS Departmental training activities and University service are also expected and valued.

Additional information about MSS (<http://www.mss.northwestern.edu/>) as well as the Third Coast Center for AIDS Research ([www.thirdcoastcfar.org](http://www.thirdcoastcfar.org)) can be found on our websites.

Applications will be accepted until the position is filled. Proposed start date is open. Salary is commensurate with experience. Interested applicants should submit a letter of interest, research statement, *curriculum vitae*, and names and contact information of 6 references to Search Chair, Brian Mustanski c/o: [mss@northwestern.edu](mailto:mss@northwestern.edu). Please reference academic search #P-155N-16.

Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes, including veterans and individuals with disabilities. Women and minorities are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
